SHED OPTIONS

**CHAPIN
SHEDS**

MADE IN THE USA

Siding

DuraTemp® siding has a natural textured appearance and is manufactured with a tough hardboard face that won't split, crack or check — even with exposure to the toughest elements. Unlike vinyl and cement siding, DuraTemp® Siding is made from real wood, and is an environmentally friendly renewable re-source.

Traditional Vinyl Siding & Vinyl Cedar Shake Siding is designed to be virtually maintenance-free and look great for years to come. Vinyl siding never needs to be stained or painted, holds up to the weather and is resistant to pests and moisture. This means no painting, scraping — just a minimal amount of care will keep your shed exterior looking new.

LP® SmartSide® Clapboard Siding & Painted Cedar Shake Siding offers the warmth and beauty of traditional wood with the durability of treated engineered wood. One of the most durable clapboard siding options in the Shed market today. The right choice when matching the beauty of your shed with your home.

Grade A Cedar Shingles & Clapboard enhance the natural beauty of your shed. Cedar is durable and resistance to moisture, decay and insect damage. Even when left untreated, Cedar ages beautifully and can be painted or stained if desired.

SITE PREPARATION

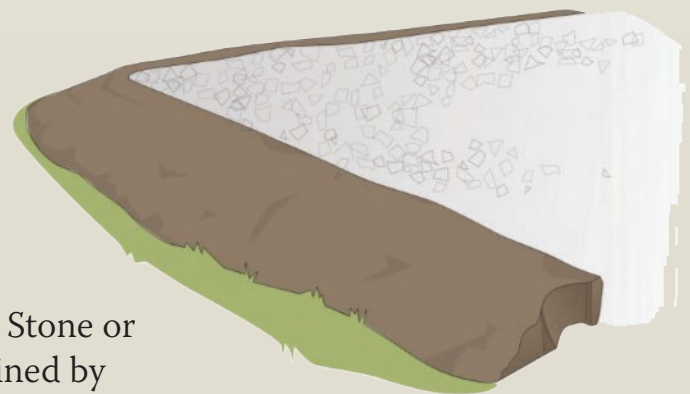

Why Does My Shed Need A Stone Pad?

Sheds, Gazebos, and Horse Barns will stand straighter and last longer when they have a solid foundation to rest on.

- Keeps Your Shed Level
- Keeps Your Shed Clean
- Prevents storm water damage
- Deters animals
- Improves appearance

Optional 6" x 6" Pressure Treated Timber Border secured to ground with 24" steel rebar

4 inches of 3/4" Crushed Stone or Dense Grade Stone Retained by Loam & Grass Seed
